Steps through Learning
Computing: Introduction to vector drawings

Vocabulary that I will learn and use during this unit of work

Vector - an image made on a computer using lines and shapes
Object - a shape used to create a vector drawing
Vector drawing - a complete image created from lines and shapes
Rotate - change the orientation of an object
Duplicate/copy - make an exact replica of an object
Zoom - get closer to a specific part of the object
Align - move an object onto the same plane
Modify - make a change
Layers - multiple objects placed on top of each other to form a vector drawing
